COME AND SEE IF THIS METHOD IS USEFUL FOR YOUR RESEARCH!!!

Social Network Analysis

Social Network Analysis (SNA) is the mapping and measuring of relationships and flows between individuals, groups, and organizations. SNA is an innovative method that can be applied across diverse research (e.g., epidemiological, community, social, clinical, basic).

Consultation Opportunities

Three individualized research consultations of 30 minutes will be provided after the seminar at each institutions. Research teams or individuals interested should complete registration.

Target Audience

Faculty, researchers (clinicians, basics, & behavioral), research teams, and students (undergraduate and graduate).

Language

Seminar will be in English.

This activity is sponsored in part by the PR-INBRE (P20GM103475 from NIH-NIGMS), PRCTRC (2U54MD007587 from NIH-NIMHD), *Instituto de Investigaciones Interdisciplinarias*, and CIES-DSC. Submitted to the CEE SA-16-10505.
