Introduction

In a letter dated June 23, 2005, the Middle States Commission on Higher Education (MSCHE) requested from the University of Puerto Rico at Cayey (UPRC) a monitoring report that documents progress in the development and implementation of a budget that is aligned with the institution's mission, goals and strategic plan. In accordance with this request, we present an institutional context update, along with a detailed analysis of our progress to date regarding how our resource priorities, budget, and strategic plan are aligned with the mission, goals and objectives of the institution.

Institutional Context Update

The recommendations that were made after the Self Study visit have been part of our institutional agenda during these two years, serving to promote a synergy among campus constituents to catalyze the on-going revision process. As a result, the institution has been involved in a number of decision-making processes related to our mission and strategic plan. Decision making on campus is characterized by significant participation of faculty, students, and non-teaching personnel. The four main decision-making groups are the Academic Senate, the Administrative Board, Faculty Committees, and Academic Departments. Furthermore, input from the faculty and regular non-teaching personnel at their meetings contribute to the decision-making processes on a variety of issues.

As a result of these participative processes, the UPRC reviewed its Mission and Goals Statement. The Academic Senate—the official forum of the academic community—during the past Self-Study visit in April 2005, had stated that the institution needed to update the Mission in order to focus on recent developments in educational principles that respond to changes occurring in higher education with relevance for UPRC. The community at large had the opportunity to react and present recommendations that concluded with the approval by the Academic Senate of a new mission statement in May 2006 with corresponding institutional objectives (Certification 89, 2005- 2006; see Appendix I). After a lengthy process, with the participation of the entire academic community, the UPRC achieved another major institutional milestone with the approval of the Strategic Plan 2006-2016 by the Academic Senate in November 2006 (Certification 16, 2006-2007; see Appendix II), which is also aligned with the Strategic Plan of

the UPR Central Administration (UPR-AC, according to its acronym in Spanish), known as *Diez para la Década*, (Board of Trustees' Certification # 123, 2005-2006).

The institutional strategic plan sets the stage for accomplishing the UPRC mission to provide an undergraduate education of excellence and improve our institutional effectiveness, while fostering the development of a sense of social responsibility and leading the campus to become one of the most dynamic and important centers of academic activity in Puerto Rico. A significant change in the UPRC Strategic Plan is that it includes initiatives that evidence a greater commitment towards assessment, research, and community service at both the faculty and student levels.

Assessment and Institutional Research Office

In January 2007 the Assessment and Institutional Research Office (AIR) was created as a unit responding directly to the Chancellor's Office (see Figure 1). With an initial assignment of \$161,088 the AIR has been fundamental in establishing an institutional framework for assessing compliance with the UPRC Strategic Plan 2006-2016, the mission and goals, along with the overall institutional effectiveness. The AIR is the primary source for gathering and analyzing quantitative and qualitative data, and conducting institutional studies to assess effectiveness at all levels. This office has initiated the design of the institutional database that will make information readily available to the community, thus increasing the assessment capabilities of all units on Campus. This capability is especially critical, given Cayey's unique status as the only liberal arts college in Puerto Rico.

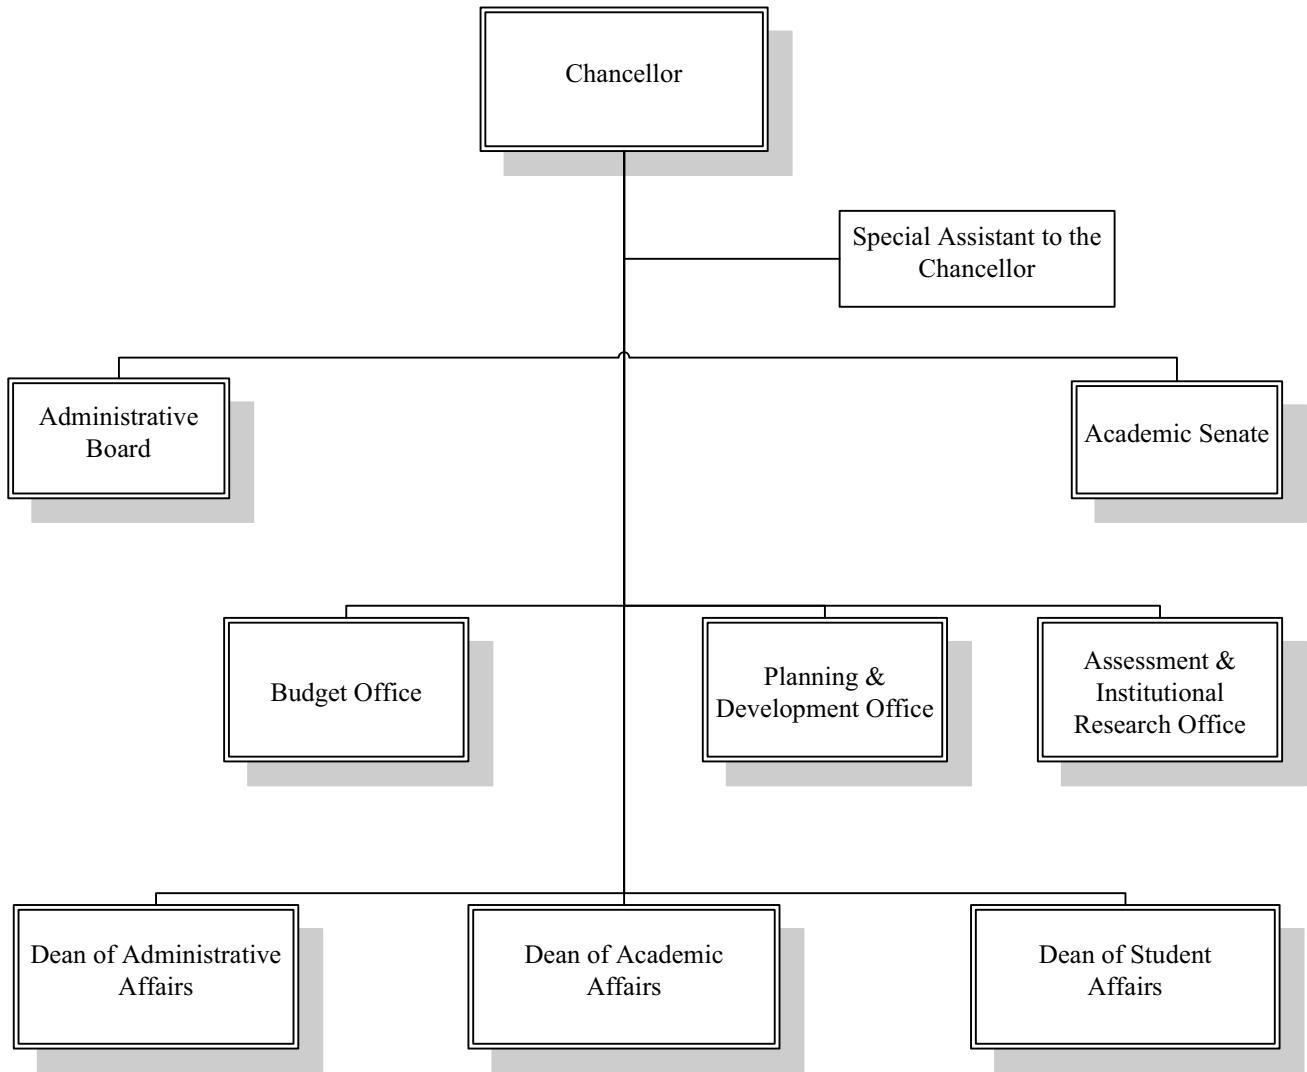

Figure 1. Updated UPRC organizational chart depicting the inclusion of the Assessment and Institutional Research Office created in January 2007.

AIR is leading the Campus in the actualization and implementation of an integrated institutional assessment plan to articulate all assessment initiatives on campus, by expanding those that were set in place by the Faculty Committee for Planning and Assessment, Academic Deanship's Assessment Committee, and at initial stages within student services and administrative areas. As a result, individual assessment plans incorporating the mission statement and goals of both the units and the institution, success indicators, the strategies for collecting, aggregating and analyzing quantitative and qualitative data, and report outcomes, among others, are underway in order to document annual accomplishments, identify strengths and weaknesses, and support

decision-making processes required for planning and budget allocation. These initiatives will be aligned with institutional priorities, and the UPRC Strategic Plan and Institutional Assessment Plan.

Research and Creative Work

The renovated mission maintains that “the UPRC is an institution committed to a well-rounded education of excellence through undergraduate programs in the preparation of teachers and in the disciplines of the natural and social sciences, humanities, and business administration”, and integrates “research, creative work, and community services as part of the teaching-learning process.” As such, the promotion of research and creative work has been given a high priority in the UPRC strategic plan, while providing students with improved opportunities in these areas. Faculty members and academic departments are stressing this component through courses and projects aimed at helping more students to pursue graduate and professional degrees. Evidence from recent achievements includes our undergraduates getting awards and acknowledgement of their work at the local and national levels.

Indicators of institutional support for research and creative work include:

- Annual allocation for seed money: Increased from \$25, 000 in FY 2005-2006 to \$60,000 for the FY 2007-2008 (Funds for the Development and Improvement of Research, FIDI, according to its acronym in Spanish) which promotes research and creative work.
- Allocation for sabbatical leaves: \$50,000 and institutional support worth approximately \$200,000 in salaries.
- Publication incentives: Sponsored by Office of the Chancellor, beginning in 2006-2007 at the rate of \$2,000 per publication in peer reviewed journals.
- Faculty professional development: The Academic Deanship also provides up to \$800 per faculty member for attending professional development activities outside our campus. Additional funds are also provided by the Chancellor’s Office.
- Teaching and research facilities: In 2007 a new science building (NEC, according to its acronym in Spanish) was inaugurated, with over 53,000 sq.ft., housing 26 state-of-the-art research and teaching laboratories for physics, chemistry, and biology. This structure

significantly increased the research facilities for faculty as well as students actively involved in a variety of research initiatives.

Progress to Date: The Budget Process at UPRC

Another significant transformation integrated into the UPRC strategic plan, is budget allocation to key areas and priorities, with an ongoing programmatic process for its development, implementation, and evaluation, providing for adjustments based on data generated by the AIR in alignment with the institution's mission and goals. The UPRC Strategic Plan identifies institution-wide priorities for various key areas, and provides the basis for budget allocation and the institutional effectiveness assessment system. As such, this process has provided for the assignment of responsibility for meeting the established priorities and assurance of accountability.

In May 2006, the Board of Trustees approved new guidelines for the development of the operational budgets of each unit within the UPR System. The guidelines require that the Chancellor request a budget proposal from each dean for operational accounts and a consolidated budget for the next fiscal year that must be aligned with their priorities, based on the UPRC Strategic Plan and *Diez para la Decada*, while taking into consideration. The new budget allocation process developed at the UPRC establishes that first priorities are identified, followed by an analysis performed by each dean to establish measurable activities and assessment. Finally, budget is allocated in order to accomplish activities in accordance with institutional priorities. The result of this process the UPRC *Strategic Plan and Budget Alignment* document, which details the institutional priorities, the strategic initiatives to be taken to attain the goals, indicators of success, and the budget allocated to each activity (see Appendix III). A summary of selected Key Areas and Critical Issues for academic year 2007-08 is presented in Table 1.

Determining Budget Priorities at the UPRC Deanships

UPRC deanships have established processes to determine budget priorities that are aligned with the institution’s Strategic Plan. The following descriptions provide insight into each area.

Deanship of Academic Affairs

The process for establishing budget priorities and allocations at the Deanship of Academic Affairs was revised in response to MSCHE recommendations. Priorities for the academic year were discussed with department chairs and at faculty meetings of the three academic areas (Science, Arts, and Professional Schools), following an analysis of the Strategic Plan by the dean and his associates to determine key areas directly concerning the deanship. At academic area meetings, faculty members were asked to identify the 10 strategic initiatives they considered to be of priority, such as undergraduate and faculty research, the revision of the General Education

curricular component, assessment, and revision of academic programs. The data (i.e., recommendations and faculty inputs) obtained from the faculty was summarized and further discussed to establish priorities and clarify strategic goals, indicators and success criteria. Finally, funds were allocated in order to successfully accomplish the stated strategic goals.

Deanship of Administrative Affairs

In accordance with the UPRC Strategic Plan, priorities of the Deanship of Administrative Affairs are defined for the next fiscal year. These priorities are identified taking into account the needs of the campus as indicated by the chairs of all the offices. This process involves an analysis of each office's requests and their respective budget implications with the following priorities in mind:

- Acquisition of technological equipment and programs to enhance personnel skills and online administrative transactions in accordance with high quality service standards.
- Assessment and revision of all administrative processes to assure that all policies and procedures respond to the institutional needs and plans.
- Maintenance, preservation, and improvement of the campus infrastructure.
- Overall improvement of the deanship's regular operations and services to the community.

The Deanship of Administrative Affairs recognizes evaluation in management and administration as an ongoing process. Significant progress is being achieved regarding these areas. This progress is evidenced through the UPRC attainment of a score of 93/100, on behalf of Puerto Rico's Comptroller in the *Special Report CP-07-07*, dated January 31, 2007. This report considers 16 criteria for evaluating excellence in administrative effectiveness and efficiency. The criteria includes: accounting, bank reconciliations, debts to governmental agencies, strategic planning, personnel development, compliance with Law 96 and Regulation 41 that pertain to the notification of irregularities and loss of public funds and property, compliance with Law 18 and Regulation 33 related to contract documentation and remittals, corrective action plans, Ethics Committee activities, and purchasing, among others.

As shown in Table 2, UPRC scores demonstrate consistent progress since FY 2001-02 from 71 to 93 in FY 2005-06. Additionally, enforcement of the UPR Board of Trustees' Certification 121, 2005-2006, *Control Procedures for Temporary Personnel Appointments*, establishes a new

basis for personnel recruitment, resulting in more effective planning and allocation of budget and human resources.

Deanship of Student Affairs

The strategic planning cycle at the Deanship of Student Affairs at UPRC initiates in August, when each unit director meets with their staff to interpret assessment data from the previous academic year. The data include results from student surveys used to determine their level of satisfaction with the services rendered by the deanship offices. In addition, under the direction of the Vice President for Student Affairs of the UPR-AC and support from the AIR, each office performs a longitudinal analysis based on campus enrollment, salaries and expenses, and services rendered. This process allows each office to assess their achievements and identify the priorities that will form the basis of their strategic plans.

Once the units have prepared their plans, the directors meet with the dean to review all plans and identify the deanship's priorities. This is followed by the development of the deanship's plan, and a budget allocation process performed in coordination with the director of the Budget office. For the 2006-2008 academic years, some of the priorities identified through this process included:

- Strengthening recruitment initiatives.
- Promoting student participation in the evaluation of services and the use of results for identifying areas to be improved, and strengthen the program of extracurricular activities.
- Obtaining the accreditation of the Interdisciplinary Development Counseling Center.

- Strengthening the services rendered by the Placement Office and improving their visibility.
- Strengthening the services offered by the Athletic Program.

Alignment of Planning and Budgeting Processes for the UPRC

The UPRC has documented progress in the development and implementation of an articulated planning and budgeting process by identifying institutional priorities and establishing success indicators in accordance to the UPRC Strategic Plan. Table 3 Documents the process of aligning the budget and the strategic plan. It also presents the role that the AIR will take on to assure that planning and budget decisions are based on sound assessment practices.

| Monthly meetings of Budget Director and deans to monitor appropriate use of funds in accordance with the approved aligned planning and budget project, and corrective actions take place. |
| Budget Director continues monitoring operational expenses and tracks unforeseen expenses. |
| Phase 3 - Assessment of Institutional Strategic Plan Effectiveness |
| Documentation of success indicators and evaluation of the assigned budget. |
| The AIR will analyze progress attained toward key areas, critical issues, goals, and objectives for the evaluation period, and will prepare, submit, and discuss the Institutional Effectiveness Assessment Report. |

1- The AIR will be carrying out these duties as of January 2007.

As depicted in Table 4, from FY 2005-2006 to FY 2007-2008, the budget assigned to the UPRC increased 15.26%, due to mandatory personnel actions. The economies that result from personnel retiring, are primarily used to respond to institutional priorities. The Budget Director has made adjustments in some projected lines of expenses based on the previous year's activity. Improvements in technology advances, student services, and research and creative activities, among others, have been made under the budget line item of *Materials, Supplies, and Services*. Under the budget line item of *Travel Expenses*, actions have also been taken to improve faculty professional training and student development.

¹ – The decrease is due to the fact that in FY 2006-07 a special assignment of \$400,000 was provided by the UPR Central Administration to equip the laboratories in the new science building.

Conclusions

The Monitoring Report reveals that in response to MSCHE's recommendations, the UPRC's assessment system and planning and budgeting processes have been revised so that budget decisions are systematically aligned with the institution's mission and strategic plan. The revised process will allow us to meet our purposes, while supporting the opportunity to manage efficiently, maintain fiscal controls, improve services and processes, and allocate resources effectively. Moreover, by establishing success criteria, UPRC will be able to document progress in meeting established goals, which, in turn, will allow revising priorities for subsequent fiscal years. As displayed in the *Strategic Plan and Budget Alignment* document (Appendix III), the revised process has allowed us to reallocate 32% of the budget, or \$932,960, as compared to FY 2006-2007, to accomplish our institutional priorities.

Through the establishment of the AIR, the UPRC has begun to implement assessment and evaluative approaches that yield results useful in institutional planning, resource allocation, and renewal. Outcomes assessment will provide feedback on goals achievement, while providing data to explain how institutional purposes and objectives were or were not met, taking into consideration how resources are used and where resources are insufficient or underutilized, amongst others, while providing the insight needed for subsequent budget alignment processes.

The result of an effective alignment of our budget process has been implementing appropriate modifications reflective of the changing needs and priorities of the institution. Evidence of solid steps improving the budget alignment have been notable, and include:

- Improved articulation of assessment, planning, and resource allocations processes are better articulated.
- An aligned budget allocation process has provided the institution with means to support its academic programs, student and administrative services.
- Institutional resources have improved and been used more efficiently.
- Responsibility has been assigned to each dean for meeting the established priorities and assurance of accountability.

- Evaluation has been conducted using quantitative and qualitative information demonstrating congruence between the institution's mission, goals, and objectives, and will be published in an institutional effectiveness assessment report.

The UPRC recognizes that there are still areas to improve regarding sound institutional management decisions. The institution has the following challenges and opportunities over the next three years:

1. Implementation and assessment of the success indicators of the UPRC Strategic Plan.
2. Effective and efficient use of institutional resources.
3. On going alignment of institutional planning and resource allocations in order to demonstrate how these processes continue linked and integrated.
4. Continue strengthening periodic assessment efforts.

However, the importance of each institutional unit collaborating in the process of analyzing their strengths and weaknesses through sound assessment processes will provide the necessary information to address the critical factors that will lead to the continuous improvement of our institutional effectiveness.
